

## **Gadsden Pediatric Clinic Vaccine Statement**

Here at Gadsden Pediatric Clinic, P.A.,

- We firmly believe in the effectiveness of vaccines to prevent serious illness and to save lives.
- We firmly believe in the safety of vaccines.
- We firmly believe that all children and young adults should receive all of the recommended vaccines according to the schedule published by the Centers for Disease Control and Prevention and the American Academy of Pediatrics.
- We firmly believe, based on all available literature, evidence and current studies, that vaccines do not cause autism or other developmental disabilities.
- We firmly believe that vaccinating children and young adults may be the single most important health-promoting intervention we perform as health care providers, and that you can perform as parents/caregivers. The recommended vaccines and their schedule given are the result of years of scientific study and data gathered on millions of children by many bright scientists and physicians.

It is for these reasons that Gadsden Pediatric Clinic requests, recommends, and strongly encourages all parents to vaccinate their children according to the CDC's recommended vaccine schedule. If you have questions or concerns about vaccines, we are happy to discuss them with you.
